

Celebrating 75 Years of Boschhammers

1932

1972

1981

1984

1997

2007

In 1932, Bosch mass-produced the world's first rotary hammer for professionals; it had an impact mechanism for drilling and chiselling. This world first celebrated its premiere at the Leipzig trade fair, setting a milestone in the construction industry. 75 years on Bosch is still pushing the boundaries of performance and reliability of professional rotary hammers, making the **Boschhammer** the choice of the professional.
